

Cell Energy

PROFESSIONAL FORMULATION

Item # VP-CE
120 tablets per bottle
Dietary Supplement

- Enhanced cellular energy
- Shown to be beneficial in the support of ATP production and cellular respiration

Big Things from Small Packages.

Every structure in the body is composed of a collection of many different cells, each performing its function in support of the overall success or failure of the human body. Each cell is especially adapted to perform one particular function. Although the functions of these cells and their end products can differ greatly, all of them have certain similar characteristics. For example, in all cells oxygen combines with a carbohydrate, fat or protein to release the energy required to function. In all cells, the basic chemical platform that changes nutrients into energy remains the same. In all cells, the waste materials are discarded into the fluids that surround it.

Featured Ingredient:

Ribose is a simple sugar that forms the carbohydrate portion of RNA and DNA molecules.

D-Ribose acts as the basis for making:

- glycogen precursors
- nucleic acids
- nucleotides
- ATP

When Ribose is combined with adenine, it produces Adenosine, one of the components of Adenosine Triphosphate (ATP). Because of this, the theory is that it may maximize ATP stores and increase cellular energy for improved exercise performance and fatigue prevention. It has also been studied as a therapy for cardiac ischemia, and shown to improve heart function during and following periods of reduced blood flow and oxygen delivery.

Directions for Use:

As a dietary supplement for adults and children 12 or more years of age, take two capsules twice daily, or as directed by a qualified healthcare professional.

Supplement Facts	Serving Size: 4 Capsules	Amount per	% DV
	Servings per Container: 30	Serving	
Vitamin B6 (from 15 mg pyridoxal-5-phosphate)	9.3 mg	550%	
Calcium (from 250 mg calcium pyruvate)	55 mg	5.5%	
Magnesium (from 15 mg pyridoxal-5-phosphate)	45 mg	11%	
Cordyceps Sinensis (0.28% adenosine)	1000 mg	*	
d-Ribose	500 mg	*	
L-Carnitine Tartate	500 mg	*	
Ashwagandha Root Extract (1% alkaloids, 1.5% withanolides)	200 mg	*	
Schisandra Berry Std. Extract (9% schisandrins)	100 mg	*	
Coenzyme Q10 (lipid soluble)	30 mg	*	
Daily Value (DV) not established DV is based on a 2,000 calorie diet.
