Although we may only think of upping our daily intake of Vitamin C when we are feeling under the weather, its benefits stretch far beyond its immune-boosting potential. Vinco's Vitamin C uses Quali®-C which is manufactured by DSM in Dalry, Scotland, and is the only Western source of Vitamin C available. Our Vitamin C comes in a liposomal form, and has a higher level of absorption compared to standard oral supplementation.†

## Vitamin C

- A water-soluble essential nutrient found in many fruits and vegetables, as well as fruit juices
- A powerful antioxidant that has the potential to reduce the risk of chronic disease and boost immunity†
- Low levels have been linked to increased problems with memory and thinking†
- Has the potential to reduce heart disease risk and manage high blood pressure†
- Studies have shown it may help reduce uric acid in the blood, which in turn can lower the frequency of gout attacks†
- Can improve the absorption of iron, thereby preventing iron deficiency†
- As a natural anti-histamine, it has been shown to be highly beneficial with seasonal allergy support†

## Essential Phospholipids

- A class of lipids that make up the backbone of the cell membrane
- Supports mitochondrial function†
- Directly tied to brain and neurological health due to their high presence in the brain†
- Can enhance and increase the neurotransmitter acetylcholine in the brain, which has the ability to protect against diseases such as dementia and Alzheimer's†
- May help to strengthen the gut lining and support healthy liver function†

## Liposomal Delivery

- Traditionally, orally administered vitamins and drugs have low bioavailability, meaning that the product loses potency while it is being metabolized, before it is absorbed by the cells in the body†
- Liposomal delivery has been shown to increase efficacy, bioavailability, absorption, and delivery†
- It works to protect the nutrient against GI issues†
- Mimics the structure of a cell membrane to specifically target the tissues it needs to without affecting other areas†
