

## PRODUCT FORMULARY

# Elderberry+ (Liposomal)

- Elderberry has long been studied for its antibacterial and antiviral activity, and is full of antioxidants†
- With Vitamin C and Prebiotic Fiber for added Immune benefits†
- Enhanced Absorption

† These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Runny nose? Cough? Maybe even a fever? All signs that we're about to need some rest and fluids to fight off a virus. As much as we may try to stay healthy in our day to day lives, when it comes to keeping from getting sick, or getting well as soon as possible, if we are already under the weather, our immune systems may need a boost to do the best job possible.

Vinco's Elderberry+ contains a potent 65:1 Black Elderberry Juice Concentrate, with Vitamin C and prebiotic Sunfiber® for optimal immune support and enhanced absorption. Our Elderberry comes in a liposomal form, which has a higher level of absorption compared to standard oral supplementation.

**ElderMune® Complex (Elderberry Juice 65:1 Concentrate and Sunfiber®)**

- Black elderberry is the berry of the Sambucus tree
- Has long been studied for its antibacterial and antiviral activity, and it is full of antioxidants†
- Has the potential to improve cold and flu symptoms, fight harmful bacteria, and support the immune system†
- The ElderMune® Complex is equivalent to 21,100 mg of fresh Elderberry per serving
- Sunfiber® is a prebiotic fiber of partially hydrolyzed guar gum that is added alongside the Elderberry Juice Concentrate in the Elder-Mune® Complex to replace the natural elderberry fiber lost during the juicing process, helping with absorption and digestion

**Vitamin C**

- A water-soluble essential nutrient found in many fruits and vegetables, as well as fruit juices
- A powerful antioxidant that has the potential to reduce the risk of chronic disease and boost immunity†
- Low levels have been linked to increased problems with memory and thinking†

- Has the potential to reduce heart disease risk and manage high blood pressure†
- As a natural anti-histamine, it has been shown to be highly beneficial with seasonal allergy support†

**Essential Phospholipids**

- A class of lipids that make up the backbone of the cell membrane
- Supports mitochondrial function†
- Directly tied to brain and neurological health due to their high presence in the brain†
- Can enhance and increase the neurotransmitter acetylcholine in the brain, which has the ability to protect against diseases such as dementia and Alzheimer's†
- May help to strengthen the gut lining and support healthy liver function†

**Liposomal Delivery**

- Traditionally, orally administered vitamins and drugs have low bioavailability, meaning that the product loses potency while it is being metabolized, before it is absorbed by the cells in the body†
- Has been shown to increase efficacy, bioavailability, absorption, and delivery†
- It works to protect the nutrient against GI issues†
- Mimics the structure of a cell membrane to specifically target the tissues it needs to without affecting other areas†
