

# **Energy Ignitor**

with Cordyceps

- Promotes Cellular Energy
  & Nitric Oxide Levels<sup>†</sup>
- Sustains Energy & Mental Alertness<sup>†</sup>
- Assists In Metabolic Function To Burn The Fuel You Make<sup>†</sup>

† These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

**Energy Ignitor with Cordyceps** is specifically formulated to support the production of ATP (adenosine triphosphate) which is the body's chief energy provider, by enhancing the transportation and delivery of essential nutrients to the mitochondria, while supporting cell respiration and rejuvenation. Our formula has been shown to increase sustained energy, stamina, nitric oxide levels, strength, and mental alertness, as well as support a general level of homeostasis within the body.<sup>†</sup>

## Vitamin B6 (Pyridoxal-5-Phosphate)

- An active co-enzyme form of Vitamin B6
- Pyridoxal-5-Phosphate can be found naturally in many foods, and as a supplement
- Promotes brain health, works in protein metabolism, aids in hemoglobin production, and creates red blood cells and neurotransmitters<sup>†</sup>

#### Calcium (Calcium Pyruvate)

- A mineral found primarily in the body's bones, as well as in its blood, muscles, and other tissues
- The rest of the calcium the body needs beyond what is stored already comes from foods like dairy and leafy greens
- Makes teeth and bones strong, helps muscles contract, and regulates heart rhythm and nerve functions<sup>†</sup>

## Magnesium (Magnesium Bisglycinate)

- One of the most common minerals found on earth, involved in hundreds of body processes
- Magnesium bisgylcinate is a combination of magnesium and the amino acid glycine, for those with too little magnesium in their blood<sup>†</sup>
- Magnesium activates ATP, which gives your body the energy it needs to function properly<sup>†</sup>

# Cordyceps sinensis (0.28% Adenosine)

- A genus of parasitic fungi
- Thought to increase production of ATP†
- May improve the way the body uses oxygen<sup>†</sup>

#### d-Ribose

- A sugar molecule that is part of your DNA
- One of the components of ATP
- May help recovery of energy stores in cells and improve muscle function<sup>†</sup>

#### **L-Carnitine Tartrate**

- The biologically active form of carnitine, which is a naturally occuring amino acid derivative
- Transports fatty acids into the cells' mitochondria, which is critical for energy production
- May lessen muscle soreness and improve recovery<sup>†</sup>

# Ashwaghanda Root Extract (1% Alkaloids, 1.5%Withanolides)

- A small shrub of which the leaves and roots are often taken as extracts or powder
- May enhance maximum oxygen consumption (VO2 max), a measure of heart and lung fitness for intense physical activity<sup>†</sup>
- May help to increase muscle strength<sup>†</sup>

#### Schisandra Berry Standardized Extract (9% Schisandrins)

- Purple-red berries, known as five flavor fruit
- May increase energy, improving endurance and coordination<sup>†</sup>

#### Co-enzyme Q10

- A compound your body produces naturally, which is stored in the mitochondria of cells
- Helps generate energy in your cells
- Decreases oxidative stress<sup>†</sup>
